

AMBINANO

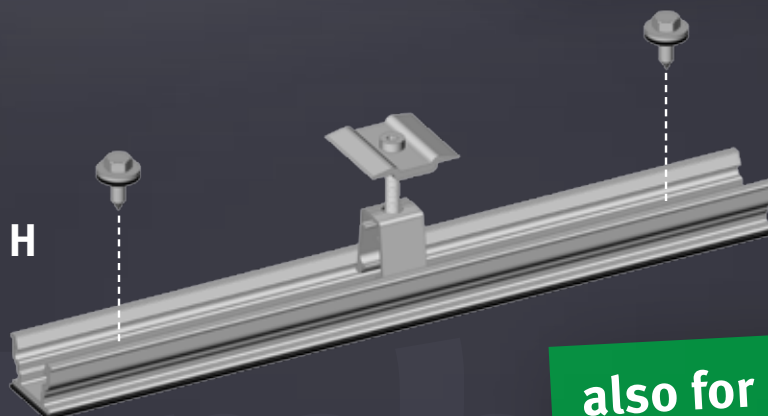

simple and convenient!

AmbiNano Q

ideal for landscape mounting
for trapezoidal metal roofs
with EasyClick clamp

AmbiNano H

also for portrait mounting

AMBINANO

PRODUCT SHEET

A very **easy and solid** mounting system for **direct module installation on trapezoidal metal roofs**

FEATURES

- AmbiNano guarantees a **rapid installation** and a **high compensation of mounting tolerances**
- AmbiNano is particularly **competitive** in purchase, transport and storage
- The virtually **chip-free thin sheet metal screws** form a funnel with **enormous adhesive force** to the sheet; **no predrilling** is required
- AmbiNano Q and H are already equipped with **drill holes** and a **EPDM strip** underside
- Optimum **protection** against **water penetration**: the supplied screws are fitted with **sealing EPDM washers** as well
- A thermal break is usually **not required** for installation with AmbiNano
- Please follow the installation instructions in our installation manual

EASYPICK CLAMPS

The EasyClick middle and end clamps can be set up for either 30-42 mm or 34-52 mm module frame height, and they click into place with a minimum of physical effort.

TOOLS REQUIRED

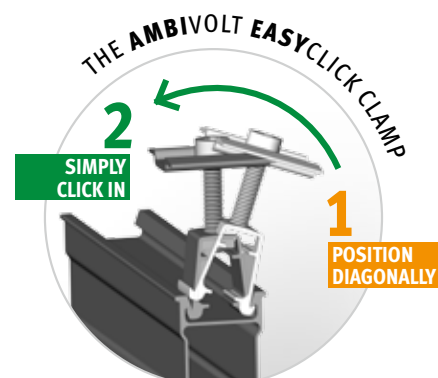

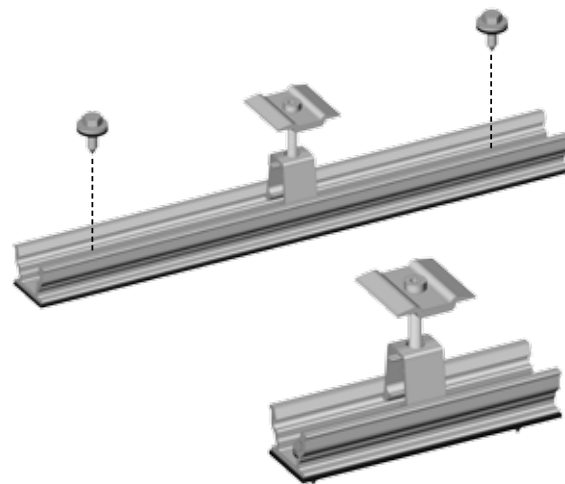

- *M8 hexagon socket*
- *Torx T30 bit*
- *Electric screwdriver*

* according to our warranty conditions in the download section of www.ambivolt.com, subject to changes (including technical changes).
